

Bug Report: BUG-CHANGE-PASSWORD-001

Tester: Rabea Adel Date: 21 / 8 / 2026

Details

Bug ID	BUG-CHANGE-PASSWORD-001
Test Case ID	TC-change-password-002
Title	Change Password accepts a password that does not pass format
Module	Backend module 0 / 1 (Auth / Change Password)
Priority	High
Test Scenario	Change password with an invalid password format just >= 8 character using a valid token
Test Data	Email: testuser@gmail.com New Password: NewPasss Confirm Password: NewPasss
Expected Result	Password should not be changed. The API should reject the request with a validation error indicating that the password doesn't format
Actual Result	Password is changed successfully and the API returns 200 OK with the message: "User password has been updated successfully."
Status	Fail
Bug Description	The Change Password endpoint accepts a password that does not satisfy "password format" requirement. The password is updated successfully even password just >= 8 character
