

Bug Report: BUG-LOGIN-001

Tester: Rabea Adel Date: 21 / 8 / 2026

Details

Bug ID	BUG-LOGIN-001
Test Case ID	TC-Login-002
Title	Login returns generic error message for invalid password
Module	Backend module 0 / 1 (Auth / Login)
Priority	Medium
Test Scenario	Login with valid email and invalid password
Steps to Reproduce	1. Send a POST request to /api/v1/Auth/login 2. Enter a valid registered email 3. Enter an incorrect password 4. Send the request
Test Data	Email: abdoanr.dev@gmail.com Password: P@ss
Expected Result	Login should fail and return 401 Unauthorized with the message: "Password invalid"
Actual Result	Login fails, but the API returns 400 Bad Request with the message: "Invalid email or password."
Bug Description	The API returns a generic "Invalid email or password." message with HTTP 400 Bad Request instead of the expected "Password invalid" message with HTTP 401 Unauthorized when the email is valid but the password is incorrect.
